

# KinderSoft Version 2010.1.0 update notes

Released July 2010

## New Features:

- Boot mode added to options, allows for setting of start-up data load mode, either Normal, Archived or All. NB: This option can be overridden by supplying command line boot mode options.
- Staff CRB number and expiry columns added to staff list view
- Rework of Staff allocation assistant.  
<http://www.kindersoft.co.uk/help/staffallocationassistant.aspx>
- Rework of multiple booking functionality.  
<http://www.kindersoft.co.uk/help/newbookingmodemultiple.aspx>
- Merge sequential hourly sessions, e.g. if you have two hourly sessions for a child on the same day the first 08:00 – 10:00 and the second from 10:00 to 12:00 then with the merge sequential session setting on the session will be displayed as 08:00 – 12:00.
- Staff: Display of number of day's holiday during specified period. Displayed on staff holidays page and available on staff list column picker.
- Child count summary footer added to register view.
- Ability to change the first invoice line text.

## Bug Fixes:

- Staff qualifications report CRB expiry date now shows expiry date, previously displayed CRB date.
- Weekly register report child's age was displaying in months due to change in undying data type, fixed to display year and months.
- Fix issue where invoices may not be produced correctly for siblings when using the invoice template option.
- Fix issue with re-generating invoices that have been voided and opting to place the invoice into the same batch as the voided invoice.

## Miscellaneous:

- Fix spelling error on multiple booking page
- Remove option end date label from booking wizard when in multiple sessions mode
- Pricing method setting applied consistently, Child pricing method option disabled if the preferences pricing method is not set to child by child.
- Child categories lookup list pre-populated, Category #1, Category #2 etc
- Default salutation format changed, now defaults to Forename <SPACE> Surname, previously default format was the same as the display format.
- Application title is now being updated to reflect the main form caption.
- KinderSoft now supports multiple instances, if KinderSoft is already running you are given the chance to start a new instance or restore the existing instance.

## Notes:

None

The KinderSoft Team.

# KinderSoft Version 2010.0.0 update notes

Released May 2010

## New Features:

- Added surgery field to doctors/health visitors contact details. Contact pick list form now shows contact type and surgery in addition to the contact name.
- Option to append the account number (if present) to the guardians name, thus pushing it through to all existing reports.
- Child categories: User defined categories that allow you to group children into. Child categories view added to population matrix mode.
- Additional item percentage mode. Additional items can now be either a monetary fixed amount or a percentage surcharge of discount (negative). Percentage mode additional items are applied to the invoice immediately after the child percentage discount.
- Weekly and monthly average child count modes added to much improved population graph view
- Option to display the balance brought forward on printed (emailed) invoices can now be set for each individual invoice with the default setting being applied at invoice generation time according to a setting on each parent/guardian.
- Usual payment day property added to parent/guardian and displayed on the payment summary form.
- Option to print batch description instead of the first invoice line on statements.
- New Batch picker form allows quicker selection of current invoice batch.
- Added the ability to append generated invoices to an existing batch. The last 25 batches are available for selection.
- New staff qualification view, lists staff qualification renewal dates and also provides functionality to filter staff lists by qualifications.
- Registration occupancy population view added.
- Option to append additional item descriptions to session description i.e. All Day (Dance Club)
- New filter option in mail merge wizard to only include primary guardians.
- Mail merge wizard now supports email attachments.

## Bug Fixes:

- Fix issue of missing invoice number sequences when re-generating invoices
- Invoice batch totals included voided invoices
- Credit column was not displayed scored if the invoice was voided
- Child age sort order fixed
- Last payment date sort order fixed
- Performance issue resolve with 'append child names to guardian name' option.
- Phantom child left behind by the fee estimator removed.
- Fix access violation when regenerating invoices (replace mode).
- Remove account association from bookings when deleting accounts.

## Miscellaneous:

- Credit category column added to credits list
- Staff date of birth property added
- Check for new version moved to <http://www.kindersoft.co.uk>
- Invoice layout adjusted to correctly format amounts of over £9999.99
- Added ability to manage age bands from the session age band pricing manage button.
- Added payee column to booking manager view.
- Set leave date function will now reset booking leave dates that are later than the selected leave date.
- Password column added to child view(s) and passed to daily register report.
